SUMMARY

Senior iOS Engineer with 7+ years building and scaling consumer apps in Swift, SwiftUI and UIKit. Rebuilt Jeeny's ride-hailing app (**~1M ride requests a day** across Saudi Arabia and Jordan) from Objective-C to modular Swift, keeping crash-free users above **99.5%** while shipping SwiftUI features, secure payments and real-time ride tracking. Previously moved Zameen.com and Bayut.com from Objective-C to Swift at Dubizzle Labs. Mentors engineers and is comfortable on the backend with Java and Spring Boot.

CORE SKILLS

iOS: Swift, SwiftUI, UIKit, Objective-C, Combine, Swift Concurrency (async/await, actors), Core Data, SwiftData, Core Location, CoreAnimation, Auto Layout, APNs, Universal Links

Architecture: MVVM, MVVM-C, Clean Architecture (VIP), VIPER, Dependency Injection, Modularization (Swift Package Manager, CocoaPods), SOLID

Testing & Performance: XCTest, XCUITest, Swift Testing, TDD, Instruments, Firebase Crashlytics & Performance, SwiftLint, SonarQube

APIs & Delivery: REST/JSON, URLSession, Alamofire, WebSockets, CI/CD (GitHub Actions, Xcode Cloud, Fastlane), TestFlight, App Store Connect, Git/GitHub, Jira, Postman, Charles Proxy

Product & Analytics: Firebase Analytics, Firebase Remote Config (feature flags), A/B Testing, AppsFlyer, Adjust

AI & Backend: AI-assisted development (Cursor, Claude Code, GitHub Copilot), Java, Spring Boot

Practices: Agile/Scrum, Code Review, Mentoring, RFCs/ADRs, Technical Documentation

Languages: English (professional), Urdu (native), Arabic (basic reading & writing)

WORK EXPERIENCE

Senior iOS Engineer / Team Lead — Jeeny

Feb 2022 – Sep 2026 · Lahore, Pakistan / Remote (KSA)

- Rebuilt Jeeny's legacy Objective-C/MVC app in Swift with MVVM and Swift Package Manager modules, migrating module by module while the app kept shipping, and cut feature build times by **~30%**.
- Kept crash-free users above **99.5%** with XCTest/XCUITest coverage and CI/CD on GitHub Actions, Xcode Cloud and Fastlane, gating every pull request on SwiftLint and tests.
- Took App Store releases from **monthly to bi-weekly**, with phased rollouts, App Review handling and live monitoring in Firebase Performance and Xcode Organizer.
- Introduced SwiftUI alongside UIKit (via UIHostingController) and built the shared UI kit on Figma design tokens, shipped as a Swift package to both the rider and driver apps.
- Moved networking from callbacks to async/await on URLSession and Alamofire and adopted Swift 6 strict concurrency (actors, Sendable), using Cursor and Claude to speed up both migrations.
- Shipped security-critical payments (rider wallet, tokenized cards with 3-D Secure, retries, driver payouts), secured with Keychain, SSL pinning, jailbreak detection and Face ID re-auth.
- Built live ride tracking and pickup/drop-off matching with Core Location, plus rider–driver chat over WebSockets.
- Shipped full Arabic/English RTL support with per-market formatting for Saudi Arabia and Jordan, and Dynamic Type across every screen.
- Cut P1/P2 production incidents by **~35%** by introducing release-readiness reviews and a shared on-call rotation.
- Mentored **3 engineers** into senior roles and **halved** code-review turnaround with a shared review standard.

Senior Software Engineer, iOS — Dubizzle Labs (formerly EMPG Labs)

Sep 2019 – Jan 2022 · Lahore, Pakistan

- Migrated Zameen.com and Bayut.com, leading property portals in Pakistan and the UAE, from Objective-C/MVC to Swift and VIP Clean Architecture in independently shippable CocoaPods modules.
- Led the redesign of both apps to Apple's Human Interface Guidelines with Product and Design, lifting the App Store rating from **3.9 to 4.5** and engagement by **~20%**.

EDUCATION & CERTIFICATIONS

Bachelor of Engineering, Computer Software Engineering — University of the Punjab
Google Project Management (2025) · IBM Java Developer (2026) · Google AI (2026), Coursera professional certificates
